Society, 315 West Ohio Street, Indianapolis, Indiana 46202.

FOREWORD

Census records are among the most useful of genealogical resources for locating a person in a certain place at a certain time. Pre-1850 enumerations are of less value than those of 1850 and later, due in part to their lack of completeness. Thus parallel records like tax and voter records provide a much needed alternative.

The Indiana enumeration of white male inhabitants over twenty-one years, as it survives, contributes significantly to the body of census-related records. The 1816 Indiana Constitution, Article III, Section 2, required, for legislative apportionment, that the general assembly "in the year eighteen hundred and twenty, and every subsequent term of five years, cause an enumeration to be made of all the white male inhabitants above the age of twenty-one years." The whole of Indiana was divided into thirty-three counties by February 1, 1820. Clerks of the circuit court were to send a record of return to the Secretary of State. Fourteen clerks did, and these records were used to make this publication of the Family History Section, Indiana Historical Society.

Mary M. Morgan, a member of the Family History Section, has generated an extremely accurate transcript of the original returns, now deposited in the Archives Division, Indiana Commission on Public Records. She worked from an enlarged photocopy of the original, copying entries exactly as they were spelled. She verified questionable entries against the original, consulted with others on interpretations of names, and checked names against the 1820 federal census and other contemporary records.

The Indiana 1820 Enumeration of Males provides an additional source for genealogists as a part of the continuing publications program of the Family History Section, Indiana Historical Society, to provide little-used but highly valuable public and private records for those interested in Indiana family history.

John J. Newman, Chair
Family History Section

INTRODUCTION

This compilation was made from a photocopy of the original record. Faded ink, poor writing and poor spelling made some of the names very difficult to read. They were copied as nearly as possible as they appear. No attempt was made to correct obvious errors in spelling. In the records of one county no "i" was dotted nor "t" crossed. Vowels were added, interchanged and omitted. Parts of Monroe and Wayne counties were especially difficult.

Every effort was made to decipher the names. Questionable ones were checked with the original record, the 1820 census and available marriage records. Check every conceivable spelling to find the name you are hunting.

Knox County was listed by township. The spelling of the township names was retained as they appear in the original record.

Perry County listed one name per household followed by an Arabic number to indicate more than one.

The following counties show the date the enumeration was certified:

Gibson	1 Nov 1820	Monroe	20 Oct 1820
Jefferson	4 Nov 1820	Perry	2 Nov 1820
Jennings	23 Oct 1820	Ripley	20 Oct 1820
Knox	13 Nov 1820	Vanderburgh	27 Sep 1820

Abbreviations used:

m/o	Name entered then marked out
+	Name appears more than once on that page
